<b>Re:</b>	Patent Application for Dale, et al	<b>Dated:</b>	March 8, 2007
<b>Serial No.:</b>	10/563,779	<b>Art Unit:</b>	
<b>Filed:</b>	January 6, 2006	<b>Examiner</b>	
<b>For:</b>	A Method of Selectively Producing male or Female Sterile Plants	<b>Action:</b>	<b>Supplemental Amendment to the Response to Notification to Comply</b>

## REMARKS

This is a Supplemental Amendment to applicant's February 6, 2007 Response to the Notification to Comply with Requirements for Patent Applications Containing Nucleotide and/or Amino Acid Sequence Disclosures. A two-month extension of time may be deemed necessary and is enclosed if needed; if additional extensions of time are deemed necessary the Applicant respectfully requests that these fees should be withdrawn from Acct. 07-0190.

It came to applicant's attention that the "Sequence Listing", paper copy and the computer readable copy (CRF), provided with the initial response did not fully comply. Applicant believes the "Sequence Listing" provided on February 6<sup>th</sup> did not include lines <140> through <151> and did not reflect 'chemically synthesized' in certain sections. Applicant apologizes for this error and respectfully requests to be allowed to provide the enclosed substitute "Sequence Listing", paper sequence listing and substitute computer readable form (CRF) copy. The Applicant's attorney has submitted the printout of the results of Checker received when this computer readable sequence was run on checker. This indicates that there were no errors.
